SUMMARY

Flutter Developer with 1 year of production experience designing and shipping cross-platform mobile applications for Android and iOS. Proficient in Flutter, Dart, Firebase, and RESTful API integration with strong command of scalable state management solutions (Provider, GetX, Bloc). Shipped live marketplace, e-commerce, and booking applications featuring real-time messaging, Stripe payment integration, and responsive RTL/LTR UI/UX. Solid foundation in Clean Architecture, MVVM, and MVC patterns. Experienced with Agile workflows, code reviews, and CI/CD pipelines.

EXPERIENCE

Cura24h, Flutter Developer

01/2026 – 05/2026 | Remote

Production marketplace app connecting buyers & service providers · [Google Play](#) & [App Store](#)

- Built and maintained a production-ready Flutter marketplace for Android and iOS with streamlined onboarding and social authentication.
- Designed a multi-role architecture (Buyer, Seller, Admin) with OTP verification and secure JWT-based authentication.
- Developed a complete booking workflow including scheduling, Stripe payments, refunds, cancellations, and live order tracking.
- Integrated Stripe, Google Maps API, Firebase Cloud Messaging, deep linking, RTL/LTR localization, and SQLite offline storage.
- Implemented real-time buyer-seller chat using Pusher Channels with support for text and image messages.
- Architected a scalable codebase using Provider with modular feature separation and reusable components.

Stack: Provider, Firebase (Auth, Firestore, FCM), REST APIs, Pusher Channels, Stripe, SQLite, Google Maps API

Cura24h Seller, Flutter Developer

01/2026 – 05/2026 | Remote

Companion vendor-management platform · [Google Play](#) & [App Store](#)

- Developed a companion seller platform enabling vendors to manage services, orders, subscriptions, payouts, and business analytics.
- Built advanced service management features including media uploads, dynamic pricing, scheduling, availability control, and category management.
- Created seller dashboards for order tracking, payment management, withdrawal requests, and business analytics.
- Integrated real-time messaging, Firebase Cloud Messaging (FCM), multilingual localization, and job proposal workflows.

Stack: Provider, Firebase (Auth, Firestore, FCM), REST APIs, Pusher Channels, Dio, Stripe

Isco App, Flutter Developer

10/2025 – 12/2025 | Remote

E-commerce & QR-based asset management app · [Google Play](#) & [App Store](#)

- Developed a production Flutter application combining e-commerce functionality with QR-based asset maintenance management.
- Built shopping workflows including product browsing, filtering, cart, secure checkout, order tracking, and wishlists using WooCommerce REST APIs.
- Implemented multilingual RTL/LTR support using GetX for state management, routing, and dependency injection.
- Integrated Firebase Firestore for user data and favorites with SQLite for offline local storage.

Stack: GetX, Firebase Firestore, WooCommerce REST APIs, SQLite, Dio

TECHNICAL SKILLS

Mobile Platforms: Android, iOS, Cross-Platform Mobile Development (Flutter & Dart)

State Management: Provider, GetX, Bloc (BLoC pattern)

Backend & APIs: Firebase (Auth, Firestore, FCM), RESTful APIs, WooCommerce APIs, Supabase

Payments & Integrations: Stripe, Pusher Channels (real-time), Google Maps API, Deep Linking, WooCommerce
Architecture & Patterns: Clean Architecture, MVVM, MVC, Dependency Injection, SOLID Principles
Testing: flutter_test, Unit Testing, Widget Testing, TDD
Storage: SQLite, Hive, Firebase Firestore
Dev Tools: Git, GitHub, GitHub Copilot, Cursor IDE, Postman, Dio, CI/CD (GitHub Actions)
UI/UX: Responsive Mobile UI/UX, RTL/LTR Localization, Dark Mode, Accessibility (a11y)
Deployment: Google Play Console, App Store Connect

PROJECTS

Booking App, Personal Project

05/2025 – 06/2025 |

Repository: [GitHub](#)

- Cross-platform hotel booking app (Android & iOS) with Firebase authentication, real-time Firestore search, and dark mode via GetStorage persistent preference.
- Implemented dynamic hotel browsing workflows, favorites management, and responsive mobile UI/UX.

Stack: GetX, Firebase (Auth, Firestore), GetStorage, Dio, SQLite

Bookly App, Personal Project

04/2025 – 05/2025 |

Repository: [GitHub](#)

- Book-browsing app using Google Books API with MVVM architecture, dependency injection via get_it, and go_router navigation.
- Implemented featured books carousel, full-text search, star ratings, reading preview, and robust error handling with Supabase backend.

Stack: Flutter, Dart, MVVM, get_it, go_router, REST APIs, Supabase

EDUCATION

Faculty of Computers & AI, Fayoum University,

09/2023 – 06/2027 | Fayoum, Egypt

B.Sc. Computer Science (in progress)

Relevant coursework: Data Structures, Algorithms, Software Engineering, Mobile Application Development, Database Systems
